2. Works in Progress

The Judiciary & Anti-Democratic Harm in Constitutional Adjudication: This article argues that U.S. courts have turned to judicial remedies to manage executive overreach, but their case-by-case approach obscures deeper democratic harm. It proposes a new framework for distinguishing ordinary policy disputes from institutional deterioration that threatens constitutional democracy.

The Religious Veto: This article argues that the Supreme Court's post-Fulton religion-clause jurisprudence has repurposed exemptions from shields against burdensome regulation into a mechanism for transferring governing authority over public programs to religious institutions at third parties' expense.
